

## The Nisshin Seifun Group

# Environmental Basic Policy

### Our Philosophy

Global environmental protection is an important issue for the whole of society toward human existence and prosperity, and the most critical management issue for companies doing business as a member of society.

Under a corporate principle of “contributing to a healthy and fruitful life for all” which is founded on the guiding philosophies of “the basis of business is built on trust” and to be “in tune with the changing climate”, Nisshin Seifun Group conducts our free and active business with deep understanding as a member of the global community for environmental protection.

### Philosophy Guideline

1. We will work on the development and design of products, and production and facilities technologies that take into account the life cycle in order to reduce environmental impact at all stages, from raw material sourcing, manufacturing, and distribution to consumption, and disposal.
2. We fully comply with environmental legislations and regulations under our Group Corporate Code of Conduct and will seek to contribute to achieve environmental policies that local governments, international organizations, and administrative authorities are promoting.
3. In all of our business activities, we will work on climate change through contributing to building a decarbonized society and addressing climate change adaptation, biodiversity conservation, and effective use of water resources, which are recognized as challenges facing humanity to realize a sustainable society.
4. In our business activities, we will work to reduce our environmental impact through energy savings, reuse and recycling of resources, and reduction of waste and water use, and utilization of recycled and biodegradable material in order to reduce our environmental impact and achieve a circular economy. We will also work on the prevention of air, water and soil pollution, including appropriate management of chemical substances.
5. We improve the workplace environment and foster a corporate culture that is always aware of environmental protection through providing information and training to employees.
6. We disclose environmental information to our stakeholders, including our performance around any environmental incidents and our response and mitigation efforts in an appropriate manner.

7. As a member of the community, we engage stakeholders to learn about local environmental issues, needs and expectations to contribute to a healthy and fruitful life for all people at all our business locations.
8. To meet the Group Environmental Basic Policy, we promote continuous improvement including review and revising our activities through stakeholder engagement. Finally, we will conduct regular environmental audits to confirm proper implementation.

(Set in 1999 and revised in 2019)
