【3】 A long-term vision “NNI ‘Compass for the Future’-Toward a New Stage-Maximizing Group-wide Capabilities and Effecting Business Model Change” (Principle 3-1-(i), Principle 1-3 and Principle 5-2)

1 Basic Views

The Group's key management policy is to maximize its long-term corporate value through “innovation” and “implementation” under the guiding philosophies that “the basis of business is built on trust” and being “in tune with the changing climate,” and the corporate principle of “contributing to a healthy and fruitful life for all” which is founded on the guiding philosophies.

Upon recognizing this key management policy, we set out our long-term vision called “NNI ‘Compass for the Future’ - Toward a New Stage - Maximizing Group-wide Capabilities and Effecting Business Model Change” in May 2018, taking into account anticipated structural changes driven by highly complex and rapid shifts in society for the next 10 to 20 years.

As for long-term vision, by having “Group-wide Capabilities” based on the “Three Collaborations” of the “Intra-Business,” “Inter-Business and “External” strengths, and “emphasis of customer oriented policy” as key, we will strengthen our business competitiveness by “business model change for existing businesses” that will establish a strong profit base and “strengthening a business portfolio” that is linked to maximizing corporate value, and further reinforce management functions which support the aforesaid initiatives. With this long-term vision as our compass for the future, we will press ahead with New Nisshin Innovation activities, and establish “a solid and firm position in the domestic food industry” as “a globally-operating company that assists ‘healthy lifestyle’ and plays a critical role in building ‘the food infrastructure’ of the future”.

In addition, we currently are considering a new medium-term management plan, starting in fiscal 2022, which will be established after thorough discussions, under the leadership of the new President who assumed office in June this year.

2 Group's long-term basic strategy

- (1) Position in the industry
By pressing ahead with our strategy for growth based on “Group-wide Capabilities,” we plan to increase our corporate value to become a corporation that establishes “a solid and firm position in the domestic food industry.”
- (2) Maximizing Group-wide capability
Each Group business “emphasizes customer oriented policy” and promotes “Three Collaborations” that use “Intra-Business,” “Inter-Business” and “External” strengths to maximize the Group-wide capability.
- (3) Strengthening business competitiveness
 - 1) Business model change for existing businesses

- Looking ahead at the upcoming environment change, we will promote a significant change of the business structure and emphasis of our business areas, and implement business model change for existing businesses that will establish a strong profit base.
- 2) Strengthening a business portfolio

We will conduct “strengthening a business portfolio that links to maximizing corporate value” with a sense of speed, putting weight on strengthening the core businesses that continue to be the profit base of the Group, focusing on allocating managerial resources to growth fields, further creation of Group synergies, and realignment of Group’s business from the perspective of profitability and growth.
 - (4) Investment policy

We will always be conscious of the capital cost, improve the mid to long-term profitability, and have a basic management policy to strike a balance between capital efficiency and financial stability to achieve an ROE which stably exceeds capital costs.

 - 1) Approach regarding financial strategy and the balance sheet

We will appropriately control our capital structure by further aggressively increasing strategic investments such as capital investment, M&A, human resource development, technical development, etc. toward sustainable corporate growth, sufficiently considering our social responsibility of stably supplying staple food, and striking a balance between the improvement of capital efficiency and financial stability. We will proceed with the reduction of cross-shareholdings in a planned manner considering business competitiveness.
 - 2) Approach regarding returning profits

We will strengthen the stable return of profits to shareholders with a long-term stance. Along with a medium- to long-term payout ratio of 40% or more as a baseline standard, we intend to buyback shares in a flexible manner, taking into account the demand for funds for strategic investments etc.
 - 3) Approach regarding capital efficiency

Aiming for EPS (earnings per share) growth from the perspectives of profit growth and capital policy, we will strive to improve our ROE (return on equity) and ensure it stably exceeds capital costs, as our profitability index for all stakeholders, while taking into consideration our Group’s “Social Mission” and “Business Model.”
 - (5) Constructing an organizational structure that increases our ability to achieve strategic growth
 - 1) Stimulating our organization and human resources

We will stimulate our organization and human resources by reforming working style and improving working environments etc. in order to improve labor productivity, by more effectively utilizing the resource of time, and greatly increase the value-add our organizations can achieve.

The holding company will certainly execute and lead policy for realizing each business’ strategy and topics affecting the entire Group, and each business will re-invigorate their business culture by aggressively challenging themselves with new endeavors and increase their strategic execution ability in order to support competitive advantages.
 - (6) Promoting continuous cyclical growth

In a business environment intermittently changed by social issues and technological innovation, we will realize sustainable growth by accurately identifying the opportunities and threats that emerge, and use our strengths to overcome and transform risks into business opportunities. The result will create a cycle of contributing to society through the added value we produce. We will develop as a corporate group that continues to be positively supported by each stakeholder, and better “Realize our Corporate Philosophy” and “Maximize our Corporate Value.” We will do so by strengthening Governance (G) as a discipline to increase our corporate value, and by promoting sustainability management that deeply connects new cross-value chains, to be established by our Group, and our contributions to Society (S) and the Environment (E), which pertain to the sustainability of business.

To this end, it is essential to build and strengthen long-term and stable relationships with business partners in the course of production and sales.

The Company will hold shares of other listed companies as cross-shareholdings if holding such shares promotes mid- to long-term increases in the Group’s corporate value, through building relationships of trust and conducting and maintaining transactions with such business partners. For instance, the Company will hold shares as a cross-shareholding, if holding shares will contribute to mid- to long-term increases of corporate value and be reasonable in terms of smoothing and solidifying business alliances and joint business, and structuring and strengthening long-term and stable business transactions.

2 The Board of Directors checks the financial record, earnings and financial condition, status of shareholder returns and credit scores, etc., of the business partner, compares the benefits and risks associated with the ownership of the shares with the Company’s cost of capital, and assesses whether or not to hold each individual cross-shareholding on an annual basis from a medium- and long-term perspective. The Board of Directors will take steps to reduce the shares that were found out to be unreasonable to own as a result of the assessment.

3 In exercising voting rights as to its cross-shareholdings, the Company will check the business environment, financial results, and mid- to long-term business strategy, etc., of the business partner, and carefully examine the agenda of the General Meeting of the Shareholders from the perspective of the significance of holding such shares for the Group and hold a dialogue with the business partner, as necessary.

Supplementary Information

1) Stock-Based Remuneration

On June 28, 2017, the 173rd Ordinary General Meeting of Shareholders passed a resolution authorizing the adoption of a plan of stock-based remuneration for the Company’s directors (hereinafter, the “plan”). In order for the remuneration of Directors of the Company to function as a healthy incentive toward sustainable growth, the remuneration of Directors are consisted of a combination of (i) a fixed basic portion corresponding to role, (ii) variable portion (bonus) reflecting his or her past performance contributions and (iii) stock-based remuneration reflecting future performance aiming to promote management that emphasizes more the enhancement of shareholder value. At present, no new share subscription rights as stock options have been issued with the adoption of the new plan.

The Company adopted a company structure with an audit & supervisory committee at the 175th Ordinary General Meeting of Shareholders, which was held on June 26, 2019. Accordingly, the meeting passed a resolution authorizing the establishment of a new cap on the aggregate amount of remuneration for Directors (excluding Directors who are Audit & Supervisory Committee Members) under the plan. In addition, the Board of Directors at its meeting held on May 14, 2020 resolved to continue the plan. The introduction of the plan for directors of major subsidiaries was resolved at the ordinary general meeting of shareholders of each subsidiary, and the continuation of the plan was resolved at the board of directors of each subsidiary.

(Overview of the plan)

For Directors (excluding directors who are Audit & Supervisory Committee Members), the new plan serves as an incentive plan designed to provide recipients with benefits on an annual basis with respect to the delivery of shares and through compensation consisting of the Company’s shares (stock-based portion) and monetary compensation from the perspective of tax payment (monetary salary portion). The number of Company shares for delivery is calculated based on a set formula derived from the Stock Remuneration Base Amount established based on the position and other relevant factors of the directors. The Company’s shares are purchased via a trust established by the Company (hereinafter, the “trust”), using funds contributed by the Company. Shares are then delivered to eligible directors from the trust. For Company shares delivered annually to the directors through the new plan, a transfer restriction period (i.e., period prohibiting the transfer, establishment of security interests and other dispositions) is to be established based on share delivery regulations for 3 years from the date of delivery. For directors, this restriction will heighten their desire to contribute to improvement in corporate value over the mid- to long-term, while raising management awareness from the viewpoint of shareholders through shared interest in profit with shareholders. In addition, we have also introduced the same stock-based remuneration plan for our executive officers and directors of Group’s major subsidiaries.

2) Bonus

The Company uses consolidated ordinary profit and factors that reflect the results of the overall management activities of the Group as indicators to show its performance, and the amount to be paid is determined by increasing or decreasing the amount of the bonus for the previous year based on the rate of increase or decrease in consolidated ordinary profit over the previous year, along with other factors.

Policy and method of determining the amounts of remuneration	Yes
--	-----

Disclosure of the policy and method of determining the amounts of remuneration

At the Board of Directors meeting, the Company established a policy for determining remuneration of individual Directors (excluding Directors who are members of the Audit & Supervisory Committee), after discussions by the Nomination and Remuneration Advisory Committee, which is a body comprising of Independent Directors. An overview of the content of the policy is as follows.

The remuneration of the Company's Directors was established with reference to three key factors, functioning to 1) retain talented human resources, 2) offer remuneration at levels appropriate to the Company's size and business domains, and 3) provide a healthy incentive to improve the Company's medium- to long-term corporate value. A certain proportion of remuneration consists of variable remuneration reflecting business performance; thus, it takes into consideration the level of contribution to the Group, the level of contribution to medium- to long-term basic Group strategies, etc.

In order to ensure that remuneration for the Company's inside Directors functions as a healthy incentive for sustainable growth, it is the Company's policy that such remuneration should comprise a combination of the following components: 1) fixed remuneration paid monthly based on role or position (basic remuneration); 2) variable remuneration reflecting contribution to past business performance (bonus), which is, in principle, paid annually with a fixed timing; and, 3) stock-based remuneration reflecting future business performance, with the objective of promoting management that focuses on shareholder value, which is paid annually with a fixed timing.

Remuneration for Outside Directors consists primarily of basic remuneration.

To ensure objectivity and propriety in the amount of remuneration, the remuneration standards for each management class are determined by taking into account factors such as the responsibilities that are specific to the management class and the significance of its impact on Group management, after referencing the results of surveys by external institutions.

As for bonuses and stock-based compensation, please refer to **【Incentives】**.

The amount of remuneration for individual Directors (excluding Directors who are members of the Audit & Supervisory Committee) is determined by the Director and President (Kenji Takihara), who is delegated this authority by the Board of Directors, as it is considered to be appropriate for the person who oversees the execution of duties across the Group to evaluate individual Directors, based on factors such as the responsibilities specific to the management class and the significance of their impact on Group management. However, these decisions are based on the policy for the method of determining remuneration for individual Directors and also are based on a set formula according to position and other factors, for basic remuneration and non-monetary remuneration (stock-based remuneration), and on the year-on-year percent change in consolidated ordinary profit and other factors for performance-based remuneration (bonuses), in order to ensure the appropriateness and objectivity of the remuneration decision-making process.

- 6) If a Specified Acquirer—which is defined as a party implementing a Specified Acquisition which has not obtained a Confirmation Resolution at the time when a Specified Acquisition was implemented—appears, the Board of Directors shall, in addition to disclosing the fact that a Specified Acquirer has appeared, implement the gratis allotment of Subscription Rights to Shares, after passing a resolution to designate a record date for the gratis allotment, an effective date for the gratis allotment, and other necessary matters in respect to the gratis allotment of Subscription Rights to Shares and publicizing the items of the resolution. "Subscription Rights to Shares" are defined as the subscription rights to shares with restrictions on the exercise of such rights by Specified Acquirer and its related parties, which are collectively defined as the Specified Acquirer and Related Parties.

If it is revealed that the ratio of holdings of the Company's share certificates, etc., by the Specified Acquirer falls below 20% by a date that is to be specified elsewhere by the Board of Directors, which shall be earlier than the record date for the gratis allotment (the Board of Directors does not intend to stipulate a day on or later than 3 business days prior to the record date for the gratis allotment.), and in some other cases, the Board of Directors may choose not to effect a gratis allotment of Subscription Rights to Shares.

- 7) If a gratis allotment of Subscription Rights to Shares is effected, the Company shall allot Subscription Rights to Shares to all common shareholders, except the Company, as of the record date for the gratis allotment, at a ratio of one Subscription Right to Shares for every one share of the Company's common stock held, and the number of shares to be issued per one Subscription Right to Shares will not exceed two, and be determined elsewhere by the Board of Directors. The value of assets contributed to exercise one Subscription Right to Shares shall be one yen, multiplied by the number of shares to be issued per one Subscription Right to Shares.
- 8) The Subscription Rights to Shares will have an acquisition clause by which the unexercised Subscription Rights to Shares can be acquired by the Company. For the Subscription Rights to Shares held by shareholders other than the Specified Acquirer and Related Parties, this is accomplished in exchange for common shares of the Company of a number equal to the integral part of the number of said Subscription Rights to Shares multiplied by the number of shares to be issued per Subscription Right to Shares. For other Subscription Rights to Shares, this is accomplished in exchange for subscription rights to shares with restriction on transfer (and with restriction on the exercise of the rights by the Specified Acquirer and Related Parties) of a number equal to the number of said Subscription Rights to Shares.

Therefore, the Plan protects the corporate value of the Company and the common interests of the shareholders, and does not pursue the personal interests of the Company's management.

- 1) The Plan received the prior approval of the shareholders at the 177th Ordinary General Meeting of Shareholders held on June 25, 2021, pursuant to the provisions of Article 45 of the Articles of Incorporation.

Therefore, the Plan can be abolished by a resolution of the Board of Directors through the election or dismissal of Directors, by an ordinary resolution at a single General Meeting of Shareholders.
- 3) To secure the neutrality of judgments relating to the Plan, the Corporate Value Committee, composed only of the Company's Independent Directors, shall deliberate the Acquisition Proposal, under legal obligations as Directors of the Company, to determine if the proposal secures and improves the Company's corporate value and the common interests of the shareholders. It is also required that the Board of Directors make a Confirmation Resolution, upon receipt of a Recommendation Resolution to that effect from the Corporate Value Committee, unless there are particular reasons that are obviously against the directors' duty of care.
- 4) To enhance the objectivity of judgment relating to the Plan, the Plan specifies when the Corporate Value Committee must issue a Recommendation Resolution, as stated in Paragraph (3) above.
- 5) Subject to the approval resolution of Ordinary General Meeting of Shareholders, the Plan can be revised every year by a resolution of the Board of Directors. This allows the Plan to adjust itself to the development of the related laws and regulations, and various other business circumstances surrounding the Company.
- 6) The validity of an approval resolution of Ordinary General Meeting of Shareholders is three (3) years. Upon the passage of three years, the Board of Directors will present a Plan that reflects any revisions, including reflection of its supplementary conditions, for approval by the shareholders.

- 7) The Plan satisfies all of the requirements for legality (to avoid suspension of the issuance of subscription rights to shares, etc.) and rationality (to gain the understanding of shareholders, investors and other stakeholders) specified in the “Securing and/or Improving Corporate Value and Common Interests of Shareholders: Takeover Defense Guidelines” released on May 27, 2005, by the Ministry of Economy, Trade and Industry and the Ministry of Justice. Moreover, the Plan is in accordance with the recommendations of the June 30, 2008 report of the Ministry of Economy, Trade and Industry’s Corporate Value Study Group, entitled “Takeover Defense Measures in Light of Recent Environmental Changes.”
