The above forecasts remain unchanged from those released on November 9, 2007.
3. Other Information
(1) Changes in important subsidiaries involving a change in the scope of consolidation during the period: None
(2) Adoption of simplified accounting methods: Yes
(3) Changes in accounting policies since the most recent fiscal year: None

Note: For details, see "4. Other Information" on page 5 under the heading of Qualitative Information/ Financial Statements.
*Statement regarding the proper use of financial forecasts and other special remarks

1. The statements contained in this document are based on various assumptions and do not constitute any guarantee or definite promise that projections of future performance or related business policies will actually be realized. For details of assumptions for financial forecasts and other related matters, see page 5.
2. According to the resolution at a meeting of the Board of Directors held on November 9, 2007, the company acquired 5 million shares of treasury stock. This acquisition is taken into account when calculating the forecast consolidated net income per share.

## Qualitative Information/Financial Statements

1. Qualitative Information on the Consolidated Business Performance
[Overview of the Period under Review]
As fierce marketing competition and high raw material prices continued during the first nine months of the fiscal year ending March 2008 (from April 1 to December 31, 2007), each of the Group’s businesses worked to expand sales by launching new products, while making continued efforts to cut costs and enhance productivity. However, a rise in the government's prices for imported wheat, combined with surging crude oil and grain prices, significantly raised procurement costs to a level that cannot be absorbed by internal efforts. The company therefore revised its product prices.

As a result, consolidated net sales for the first nine months of the fiscal year ending March 2008 increased $1.9 \%$ compared with the same quarter of the previous fiscal year to $¥ 322,573$ million. As the cost rise could not be absorbed completely due to the timing of price revisions and the emergence of additional cost-raising factors, operating income decreased $3.1 \%$ to $¥ 13,741$ million and ordinary income declined $0.5 \%$ to $¥ 16,799$ million. Due to an increase in extraordinary gains, net income rose $16.2 \%$ to $¥ 9,918$ million.
[Business Overview by Segment]
(1) Flour Milling Segment

As the government introduced a variable wheat sales price system for imported wheat in April 2007 that resulted in increases in the government's prices for imported wheat by an average $1.3 \%$ in April 2007 and an average 10\% in October 2007, the company revised its prices for commercial flour.

As the severe business environment characterized by an ongoing demand shift toward lower-priced products continued, the company increased flour shipments above the previous year's level by moving ahead with relationship-based marketing to strengthen relations with customers and other efforts for sales expansion.

In production and distribution, the company continued to carry out measures to boost productivity, including the construction of additional lines that are scheduled to start operation in 2008 at the Higashinada Plant. The company also promoted the reliability and safety of its products.

The price of bran, a by-product of the milling process, enjoyed a steady increase due to soaring grain prices and other factors.

In overseas operations, the continued implementation of dynamic marketing strategies resulted in higher sales than the previous year's level.

## (2) Processed Food Segment

During the period under review, the processed food business revised its prices for De Cecco Pasta and $\mathrm{Ma} \cdot \mathrm{Ma}$ Pasta sauce products in September 2007 in response to surging raw material prices. The company also revised its prices for household-use flour and flour-processed food products and pasta, following its price revision for commercial flour in November 2007. However, procurement costs have increased further to the extent that additional price revisions are required. The processed food business's domestic sales exceeded the previous year's level through efforts to expand sales, including the aggressive implementation of the $M a{ }^{\bullet} \mathrm{Ma}$ Ban Pasta promotional activities. Overseas, sales of prepared mix products surpassed the previous year's level, as a result of sales expansion efforts by tapping into new demand for prepared mix products in China and Thailand.

In the yeast and biotechnology business, high material prices forced the company to revise the
prices of some of its products. In the yeast business, sales of yeast-related and flour paste products exceeded the previous year's level, whereas sales of mayonnaise and prepared dishes fell below the previous year's levels. In the biotechnology business, sales of biochemical and immunochemical products, bionutritional products and feed for fish farming were higher than a year earlier, but sales of feed for laboratory animals and research support services were below the previous year's level. As a result, overall sales for this business remained almost unchanged from a year earlier.

In the healthcare foods business, the fading craze for coenzyme $\mathrm{Q}_{10}$ and increased production by other companies resulted in a change in the supply-demand balance, forcing the company to suffer a continued harsh marketing environment. As a result, overall sales for the healthcare foods business fell below the previous year's level.

## (3) Others Segment

In the pet food business, sales of pet food for dogs and cats surpassed the previous year's level, as a result of consistent profit-earning efforts to counter rising procurement costs primarily due to a rise in ingredient prices, as well as sales expansion strategies including the aggressive launch of new products.

Sales of the engineering business were lower than the previous year's level, because the completion of plant engineering projects concentrates more in the fourth quarter from January to March, compared with the previous year.

The mesh cloths business saw favorable growth in sales of chemical products, including industrial-use mesh cloths and automotive filters, whereas sales of mainstay mesh cloths for screen-printing applications stayed almost the same as the previous year's level. Overall sales for this business were higher year on year.

## 2. Qualitative Information on the Consolidated Financial Position

On a consolidated basis at the end of the third quarter of the fiscal year ending March 2008, current assets declined $¥ 10.3$ billion from the previous year-end to $¥ 168.2$ billion, mainly due to a decrease in cash and cash equivalents. Fixed assets decreased $¥ 3.3$ billion to $¥ 226.4$ billion, reflecting a decrease in investments and other assets, despite an increase in property, plant and equipment. As a result, total assets fell $¥ 13.7$ billion from the previous year-end to $¥ 394.6$ billion. Meanwhile, current liabilities declined $¥ 3.5$ billion to $¥ 63.7$ billion mostly due to a reduction in short-term debt, and long-term liabilities decreased $¥ 5.3$ billion to $¥ 35.4$ billion chiefly due to a decrease in deferred tax liabilities. As a result, total liabilities decreased $¥ 8.9$ billion from the previous year-end to $¥ 99.2$ billion. Net assets declined $¥ 4.8$ billion to $¥ 295.4$ billion, reflecting decreases due to acquisition of treasury shares and in valuation and translation adjustments, although retained earnings increased because net income surpassed the payment of dividends.

In consolidated cash flows, net cash provided by operating activities during the first nine months of the fiscal year ending March 2008 was $¥ 17.7$ billion. Of this amount, $¥ 14$ billion was used for strategic capital expenditures, whereas $¥ 3.8$ billion was appropriated to the repayment of borrowings. Meanwhile, for further distribution of earnings to our shareholders, a payment of dividends totaling $¥ 4.5$ billion was made and $¥ 5.6$ billion was spent for acquiring treasury shares, including less-than-unit ones, during the period under review.

As a result, consolidated cash and cash equivalents at the end of the third quarter of the fiscal year ending March 2008 decreased $¥ 10.9$ billion from the previous year end to $¥ 37.4$ billion.

## 3. Qualitative Information on Consolidated Performance Forecasts

Severe competition and rising costs are expected to continue in the fourth quarter of the fiscal year ending March 2008. Each business of the Group will make continued efforts to increase market share and reduce costs, while seeking further price revisions. The consolidated performance forecasts for the fiscal year ending in March 2008 remain unchanged from those released in November 2007: $¥ 428$ billion for net sales, or an increase of $2.3 \%$ from a year earlier; $¥ 18.5$ billion for operating income, or a decline of $3.6 \%$; $¥ 22.1$ billion for ordinary income, or a fall of $3.1 \%$; and $¥ 12$ billion for net income, or a decrease of $2.5 \%$.

Although the business performance during the period under review was sluggish, the company will make continued cost-cutting efforts by promoting cost-conscious operations driven by the start of operating the new milling line at the Higashinada Plant and the construction of the new line for prepared mix products at the Tatebayashi Plant, while aggressively pursuing increased market share and an accelerated launch of next-generation products.
4. Other Information
(1) Changes in important subsidiaries involving a change in the scope of consolidation during the period None.
(2) Adoption of simplified accounting methods

A simplified method is adopted for accounting the depreciation of fixed assets, because its effects are immaterial.
(3) Changes in accounting policies since the most recent fiscal year None.
