- Net sales **increased** mainly due to the implementation of wheat price revisions in the domestic flour milling business, higher wheat prices in the overseas flour milling business and foreign currency translation effects, and steady sales in the prepared dishes and other prepared foods businesses.
- Operating profit **increased** due to strong bran prices in the domestic flour milling business and favorable performance in the overseas flour milling business.
- Quarterly **loss** due to impairment loss in the Australia flour milling business based on re-examination of the business plan, considering market changes influenced by strict COVID-19 measures in Australia.

5. Fiscal 2023 Forecasts (1)

- Net sales are expected to **increase** due to the continued impact of the same factors as in the first half's results.
- Operating profit is expected to **increase** due to steady bran prices in the domestic flour milling business, strong results in the overseas flour milling business, and a decrease in depreciation and amortization resulting from implementing the impairment loss in the Australia flour milling business.
- **Loss** resulting from impairment loss in the Australia flour milling business despite an expected extraordinary gain from the sale of investment securities in the second half.
- Results forecasts had already been announced on October 19. Operating profit and ordinary profit **were revised upward**, while profit **was revised downward**.
