*Statement regarding the proper use of financial forecasts and other special remarks

- The statements contained in this document are based on various assumptions and do not constitute any guarantee or definite promise that projections of future performance or related business policies will actually be realized. For details of assumptions for financial forecasts and other related matters, see pages 5 to 7.
- Effective from the fiscal year ending March 31, 2009, the company adopted the Accounting Standard for Quarterly Financial Reporting (ASBJ Statement No. 12) and Guidance on the Accounting Standard for Quarterly Financial Reporting (ASBJ Guidance No. 14). The company prepares its quarterly consolidated financial statements in accordance with the "quarterly consolidated financial accounting rules." According to the provision of Article 7, Paragraph 1-5, of the Additional Rules to the Cabinet Office Ordinance on Partial Revision of the Regulation for Terminology, Forms and Preparation of Financial Statements and Other Regulations (Cabinet Office Ordinance No. 50 on August 7, 2008), preparation of the consolidated financial statements for the second quarter of the fiscal year ending March 31, 2009, complies with the revised quarterly consolidated financial accounting rules

Qualitative Information/Financial Statements

1. Qualitative Information on Consolidated Business Performance

[Overview of the Period under Review]

During the period under review, we experienced continued increases in procurement costs, including a 30% average rise in the government's sales prices for imported wheat in April 2008. To counter the situation, the company worked to boost demand for the group's core products by launching new products and promoting aggressive advertising campaigns. Meanwhile, the construction of additional lines at the Higashinada Plant to boost capacity and increase productivity was completed in September 2008 and they have now started operation. Extensive cost-cutting efforts are also under way. However, the significant increase in procurement costs was more than could be absorbed internally, and the company had to revise its product prices upward.

As a result, consolidated net sales for the first half of the fiscal year ending March 2009 increased from the same period of the previous fiscal year to ¥231,395 million. For the fiscal years ended March 2007 and 2008, the Processed Food Segment suffered stagnant profitability because product price revisions were not conducted swiftly enough to absorb increased procurement costs. For the period under review, however, the business performance of the Processed Food Segment improved, raising the company's consolidated operating income to ¥9,798 million and ordinary income to ¥11,187 million. However, net income decreased, reflecting a significant fall in extraordinary income from the same period of the previous fiscal year.

[Business Overview by Segment]

(1) Flour Milling Segment

The company aggressively explored new markets by promoting relationship-based marketing, but the severe market environment, as represented by the industry's overall demand weakness, caused flour shipments to decrease slightly below the previous year's level. In response to a 30% average rise in the government's sales prices for imported wheat in April 2008, the company revised its flour prices upward in the same month, securing a rise in the segment's sales from the same period of the previous fiscal year.

In production and distribution, the company continued to carry out measures to boost productivity and improve logistics, as the construction of additional lines at the Higashinada Plant was completed and they started full-scale operation in September 2008. The company also continued to enhance the reliability and safety of its products.

The price of bran, a by-product of the milling process, enjoyed a steady increase owing to high grain market prices.

In overseas operations, the company endeavored to strengthen relationships with customers and carried out price revisions to counter high wheat market prices, which resulted in favorable sales.

As a result, net sales of the Flour Milling Segment were ¥98,358 million, and operating income was ¥5,227 million.

(2) Processed Food Segment

During the period under review, the processed food business revised upward its prices for household-use flour and flour-processed food products in May 2008 and for the imported pasta *De Cecco* series in September 2008. Although the entire food industry suffered sluggish demand, the company launched 26 new items for household-use in August 2008 and made continued efforts to

boost demand by carrying out aggressive promotional efforts, such as the *Ma Ma Dinner Pasta* promotion. As a result, net sales for the business remained almost unchanged from the same period of the preceding fiscal year. Meanwhile, operating income increased owing to improved profitability, which had declined due to the delay of price revisions to absorb increased procurement costs, and cost-cutting efforts continued by reviewing sales promotion and other costs. In the prepared dishes and other prepared foods business, various measures to improve profitability were steadily implemented. The overseas business achieved favorable sales, as a result of efforts to create demand, including the launch of an R&D center in Thailand to enable active product proposals.

Sales of the yeast business increased, as sluggish sales of yeast and bread improvers were more than offset by the favorable performance of butter creams, prepared dishes and mineral yeast. Sales in the biotechnology business also increased, reflecting favorable sales of biochemical, immunochemical and bionutritional products, despite the sluggish performance of entrusted testing services and feed for fish farming.

Sales of the healthcare foods business remained unchanged from the previous year due to the continuing severe situation of coenzyme Q_{10} , although the company sought to expand sales of value-added products by accelerating the launch of new products.

As a result, net sales of the Processed Food Segment were ¥114,235 million, and operating income was ¥3,288 million.

(3) Others Segment

The pet food business carried out upward product price revisions to counter rising procurement costs primarily due to a sharp rise in ingredient prices. Despite the effort to expand sales by aggressively launching new products, the upward price revisions decreased the level of shipments, holding sales in the pet food business at the previous year's level.

Sales of the engineering business declined primarily due to increased sluggishness in the capital expenditures of the industries related to the mainstay plant engineering services, although revenue from equipment sales and entrusted powder-processing services increased.

Sales and income of the mesh cloths business were weak, reflecting the sluggishness of mainstay mesh cloths for screen-printing applications and industrial-use materials for speaker grills, etc., despite strong sales of forming filters.

As a result, net sales of the Others Segment were \$18,801 million, and operating income was \$1,327 million.

2. Qualitative Information on Consolidated Financial Position

The company's consolidated assets, liabilities and net assets at the end of the second quarter of the fiscal year ending March 2009 were as follows.

Current assets declined ¥3,141 million from the previous year-end to ¥163,699 million, mainly due to decreases in cash and marketable securities and an increase in inventories. Fixed assets increased ¥1,999 million to ¥216,953 million, mainly reflecting an increase in investments and other assets. As a result, total assets decreased ¥1,141 million from the previous year-end to ¥380,653 million. Meanwhile, current liabilities declined ¥4,767 million to ¥53,957 million, mostly due to a reduction in notes and accounts payable, whereas long-term liabilities increased ¥798 million to ¥34,028 million, primarily due to an increase in deferred tax liabilities. As a result, total liabilities

decreased ¥3,968 million to ¥87,986 million. Net assets increased ¥2,826 million to ¥292,666 million, reflecting an increase due to net income for the period, a decrease due to the payment of dividends and an increase in valuation and translation adjustments.

The company's consolidated cash flows for the first half of the fiscal year ending March 2009 were as follows.

Cash flows from operating activities

Increases in cash mainly from income before income taxes and minority interests of \$10,605 million and depreciation and amortization of \$7,424 million were surpassed by decreases in cash primarily due to an increase in inventories of \$15,025 million and income taxes paid of \$3,853 million. As a result, net cash used in operating activities during the first half of the fiscal year ending March 2009 was \$5,648 million.

Cash flows from investing activities

Although proceeds from time deposits with terms exceeding three months and marketable securities surpassed payments thereof by ¥6,400 million, payments for purchases of tangible and intangible fixed assets amounted to ¥7,213 million. As a result, net cash used in investing activities during the first half of the fiscal year ending March 2009 was ¥806 million.

Free cash flow, the sum of cash flows from operating and investing activities, amounted to an outflow of ¥6,454 million in the first half of the fiscal year ending March 2009.

Cash flows from financing activities

Primarily due to the payment of dividends to shareholders amounting to ¥2,235 million, net cash used in financing activities was ¥3,182 million.

As a result, consolidated cash and cash equivalents at the end of the second quarter of the fiscal year ending March 2009 decreased \(\frac{\pma}{10}\),374 million from the previous year-end to \(\frac{\pma}{28}\),542 million.

3. Qualitative Information on Consolidated Performance Forecasts

The company enjoyed favorable business performance during the first half of the fiscal year ending March 2009. However, there was an across-the-board 10% raise in the government's sales prices of imported wheat in October 2008 and the industry-wide level of shipments declined from the previous year in the markets associated with the company's major products in the Flour Milling and Processed Food segments. Moreover, the entire world economy is experiencing severe conditions, as represented by the worldwide financial crisis and the slump in stock markets stemming from the subprime loan crisis in the United States. Due to the increasing uncertainty of the future business environment, our performance forecasts for the full-year period remain unchanged from the original projections.

To overcome these difficulties, the group will step up advertising and promotional activities and focus on increasing shipments of high-value-added products, while continuing to promote cost reductions in all of its business fields. In addition, we will secure product prices commensurate with costs in all business segments, while promoting business expansion in areas with high growth potential, including the overseas business.

As concern for food safety is growing, the group will continue to reinforce its quality assurance system and promote environmental protection efforts, as represented by the group-wide acquisition of the ISO 14001 certification in September 2008.

(1) Flour Milling Segment

Under the increasingly severe flour market circumstances, the company will strive for greater market share by further strengthening customer relationships by creating demand through the development of products that swiftly and accurately reflect market changes and customer needs and offering marketing proposals. In production and distribution, the additional lines at the Higashinada Plant started full-scale operation in September 2008, contributing to cost reductions by boosting productivity. In addition, the company will continue to enhance the reliability and safety of its products.

Following the October 2008 across-the-board 10% raise in the government's prices for imported wheat, the company will begin to make upward price revisions for wheat flour in November 2008.

In overseas operations, the company will continue to promote business expansion in North America and Southeast Asia.

(2) Processed Food Segment

In the processed food business, the company, as a "mealtime solution provider," will continue to promote the development of new products based on the concepts of authenticity, convenience and good health, and enhance the image of its $Ma \cdot Ma$ brand, while carrying out cost-cutting measures. Beginning in November 2008, the company will make upward price revisions for household-use flour and flour-processed food products to reflect increases in the prices of wheat flour and other ingredients. The prepared dishes and other prepared foods business will continue to implement measures to improve profitability. For overseas operations, focused efforts will be directed toward the expansion of businesses in Southeast Asia and China.

The yeast business will seek sales expansion by offering a packaged deal of yeast, bread improvers and fermented liquids and the launch of new items of flour paste and butter cream, while carrying out product price revisions to counter increased ingredient and other prices. The biotechnology business will promote the launch of new biochemical and immunochemical products, while exploring a greater spectrum of laboratory animal and analysis businesses.

The healthcare foods business will revise its production and sales systems to deal with the lingering difficult conditions of the coenzyme Q_{10} market, while stepping up efforts to develop new materials and products.

(3) Others Segment

The pet food business launched the first over-the-counter products of the *JP-Style* brand—a premium dog food made of selected domestic materials—in October 2008. The company will continue to exploit its advantages as a domestic manufacturer to develop new dog and cat food products differentiated by safety, health and taste, while making aggressive marketing efforts.

The engineering business is expected to suffer increasingly sluggish capital investments by related industries. However, the company will endeavor to secure orders for the mainstay plant engineering services, further expand the currently favorable sales of powder-processing machines and seek greater procurement cost reductions.

The mesh cloths business will continue to aggressively develop overseas markets, strengthen

domestic sales capabilities, enhance R&D systems and improve the efficiency of production and purchase departments.

Accordingly, the consolidated performance forecasts for the fiscal year ending March 2009 remain unchanged from our original projections: ¥475.0 billion for net sales (10% year-on-year increase), ¥19.5 billion for operating income (1.6% increase), ¥22.2 billion for ordinary income (0.1% increase) and ¥12.5 billion for net income (12.1% increase).

4. Other Information

- (1) Changes in important subsidiaries involving a change in the scope of consolidation during the period None.
- (2) Adoption of simplified accounting methods and specific methods for quarterly accounting (Specific methods for quarterly accounting)

Tax expenses are calculated in accordance with Paragraph 12, "Method for Using the Statutory Effective Tax Rate," of the Practical Guidelines on Tax-Effect Accounting for Preparation of Interim Financial Statements, pursuant to the provision of Paragraph 19 of the Guidance on the Accounting Standard for Quarterly Financial Reporting.

The amount of "Income taxes—deferred" is included in "Income taxes."

- (3) Changes in accounting policies and procedures and the method of presentation for preparing quarterly consolidated financial statements
 - 1. Changes as a result of a revision to the accounting standards
 - 1) Effective from the fiscal year ending March 2009, the company adopted the Accounting Standard for Quarterly Financial Reporting (ASBJ Statement No. 12 issued on March 14, 2007) and Guidance on the Accounting Standard for Quarterly Financial Reporting (ASBJ Guidance No. 14 issued on March 14, 2007). The company prepares its quarterly consolidated financial statements in accordance with the "quarterly consolidated financial accounting rules." According to the provision of Article 7, Paragraph 1-5, of the Additional Rules to the Cabinet Office Ordinance on Partial Revision of the Regulation for Terminology, Forms and Preparation of Financial Statements and Other Regulations (Cabinet Office Ordinance No. 50 on August 7, 2008), preparation of the consolidated financial statements for the second quarter of the fiscal year ending March 31, 2009, complies with the revised quarterly consolidated financial accounting rules.
 - 2) Effective from the first quarter of the fiscal year ending March 2009, the company adopted the Accounting Standard for Measurement of Inventories (ASBJ Statement No. 9 issued on July 5, 2006). As a result, the valuation standards and methodology for inventories have changed as follows: flour and bran are stated at cost—instead of at the lower of cost or market—with cost being determined by the retail cost method, and for their carrying amounts on the balance sheet, write-downs according to decreased profitability of assets are applied; other products are primarily stated at cost—instead of at the lower of cost or market—with cost being determined by the periodic average method, and for their carrying amounts on the balance sheet, write-downs according to decreased profitability of assets are applied; and raw materials are stated at cost, with cost being determined by the moving average method, and for their carrying amounts on the balance sheet, write-downs according to decreased profitability of assets are applied.
 - The effects of this change to the company's consolidated profit and income and segment information during the first half of the fiscal year ending March 2009 are negligible.
 - 3) Effective from the first quarter of the fiscal year ending March 2009, the company adopted Practical Issues Task Force No. 18, "Practical Solution on the Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements" (issued by the

ASBJ on May 17, 2006), and made necessary adjustments when preparing the quarterly financial statements.

This adoption reduced fixed assets at the beginning of the fiscal year ending March 2009 by ¥120 million, retained earnings by ¥48 million and minority interests by ¥72 million.

The effects of this adoption to the company's consolidated profit and income and segment information during the first half of the fiscal year ending March 2009 are negligible.

2. Changes other than above

Effective from the first quarter of the fiscal year ending March 2009, the company adopted the Accounting Standard for Lease Transactions (ASBJ Statement No. 13, originally issued on June 17, 1993, by the First Committee of the Business Accounting Council and revised on March 30, 2007) and Guidance on the Accounting Standard for Lease Transactions (ASBJ Guidance No. 16, originally issued on January 18, 1994, by the Accounting System Committee of the Japanese Institute of Certified Public Accountants and revised on March 30, 2007). As a result, finance leases without transfer of ownership are accounted for as leased assets using the same methods as those used for ordinary sales transactions, instead of ordinary lease transactions. Depreciation expense is computed by the straight-line method over the useful life of the leased assets with a residual value of zero.

For finance leases without an ownership transfer for which the lease transaction had started before the fiscal year when this accounting standard was introduced, the conventional method was applied.

The effects of this adoption to the company's consolidated profit and income and segment information during the first half of the fiscal year ending March 2009 are negligible.
